**TRIBAL LANDS
URANIUM PERMITS
TRACTS 8, 9, 10**

Confidential Claim Retracted

Authorized by: SC

Date: 6/25/13

On September 16, 1971, the writer accompanied by Gene Saucier, geologist for Continental Oil Company, inspected the Laguna Tribal land uranium permits known as Tracts 8, 9, and 10. The lands involved include 37,503 acres located in Townships 11, 12, & 13 North, Ranges 1 and 2 West, NMPM, Sandoval and Bernalillo Counties, New Mexico.

Drilling operations were not being conducted at the time of inspection. Drilling on the Phase II program will resume in the near future.

The holes that produced artesian water have been plugged with cement with the exception of the hole requested to be left open by the Pueblo of Laguna. Continental has also drilled and completed a water well in Tract 10 for their use.

Reconditioning of roads and drill sites is being done. Some roads and drill sites are being reseeded, but the major part of the reseeding will be done next spring.
